# Coronavirus (COVID-19) Information

# **Update 8: March 21, 2020**

Good afternoon,

Governor Murphy has enacted <u>Executive Order No. 107</u> "Stay at Home" Order. **Work at construction sites may continue**, as can <u>manufacturing</u>, trucking, and transportation operations. Only essential travel allowed.

Click HERE for Executive Order No. 107

# **Click HERE for Executive Order No. 108**

As we mentioned yesterday, we expected a strong encouragement to move every employee to work from home where possible. All businesses or non-profits in the State, whether closed or open to the public, must accommodate their workforce, wherever practicable, for telework or work-from-home arrangements. For purposes of this order, "telework" means the practice of working from home or alternative locations closer to home through the use of technology that equips the individual to access necessary materials.

Where teleworking or working from home is not an option, there is a strong request to reduce staff on site to the minimal number to ensure safe operations. To the extent a business or non-profit has employees that cannot perform their functions via telework or work-from-home arrangements, the business or non-profit should make best efforts to reduce staff on site to the minimal number necessary to ensure that essential operations can continue. Examples of employees who need to be physically present at their work site in order to perform their duties include, but are not limited to, law enforcement officers, fire fighters, and other first responders, cashiers or store clerks, construction workers, utility workers, repair workers, warehouse workers, lab researchers, information technology maintenance workers, janitorial and custodial staff, and certain administrative staff.

Manufacturing, industrial, logistics, ports, heavy construction, shipping, food production, food delivery, and other commercial operations may continue operating, but as explained above, they should limit staff on site to the minimal number to ensure that essential operations can continue.

Employees reporting to work are permitted to travel to and from their place of business. Businesses are encouraged to give each employee a letter indicating that the employee works in an industry permitted to continue operations.

Of particular note, Governor Murphy also signed <u>Executive Order No. 108</u>, which invalidates any county or municipal restriction that in any way will or might conflict with any of the provisions of <u>Executive Order No. 107</u>. This is effective at 9 p.m. on

Saturday, March 21 as well. The only exceptions are two categories over which municipalities or counties may impose any additional restrictions: 1) online marketplaces for arranging or offering lodging and 2) municipal or county parks.

The state has created this website: How do Executive Orders No. 107 and 108 on closures and social distancing affect my business to answer any business questions.

As expected, there is a backlog getting new companies registered into the <u>Private Sector Essential Employee Registration Project</u>. And earlier today, the system used to input new companies was down. OEM is doing all it can to process new companies, but as you can imagine the demand has increased tenfold. The list I create and send every evening is getting through to the main person in charge of the program. They are going through the list but were delayed because of the down system. Just a reminder this is a program for Critical Infrastructure facilities. <u>Please, do not forward my email to your service providers, as I will not be able to get them access to the program at this time.</u> It is likely that OEM will reach out to you via phone first, and even over the weekend. We ask for everyone's patience with this if you have submitted your request and haven't heard from OEM.

We suggest that you continue to remind your employees to have their work ID accessible while driving to and from work, so they can present it with their license if necessary and provide them with a letter as stated above. OEM may provide a letter template, if they do, we will forward it immediately. But we suggest for now to follow the DHS Guidance.

There are a lot of rumors going around about what may or may not happen. DHS has informed us that there is a coordinated campaign to distribute misinformation about COVID-19 and response. They suggest accessing information from official state or federal sites only, and this site <u>Coronavirus Rumor Control</u> has been also set up by FEMA.

Below you will find new information highlighted in blue added since the last update. As well, take some time and explore the many links and information provided below, as it can be great resource for your company and provide many answers to questions you might have.

# **New Jersey Governor Updates**

Governor Murphy Announces Statewide Stay at Home Order, Closure of All Non-Essential Retail Businesses

To mitigate the impact of COVID-19 and protect the capacity of New Jersey's health care system for the state's most vulnerable, Governor Phil Murphy today signed Executive Order No. 107, directing all residents to stay at home until further notice. The order provides for certain exceptions, such as obtaining essential goods or services, seeking medical attention, visiting family or close friends, reporting to work, or engaging in outdoor activities. ### TRANSCRIPT: March 20th, 2020 Coronavirus Briefing Media

Our asks are pretty much every time out more PPE to protect our extraordinary healthcare workers, the heroes, our first responders; secondly the boots on the ground as FEMA Region 2 has showed this week with extraordinary support. The Army Corps, potentially the VA; other actual, tangible sources. We mentioned with Dr. Esper the possibility to get some medical personnel from the Defense Department. And then, the third piece again is we're going to need, as I said, we're going to need a bigger boat. And we need a lot more money to allow us to continue to do what we're doing.

Governor Murphy Takes Action on COVID-19 Legislation

Today, Governor Phil Murphy signed the following bills and resolutions into law Click here for release

Governor Murphy Signs Legislation Authorizing the EDA to Provide Grants During Periods of Emergency and to Extend Documentation Submission Deadlines

In response to the ongoing COVID-19 pandemic, Governor Phil Murphy today signed legislation (A3845) that authorizes the New Jersey Economic Development Authority (NJEDA) to make grants during a state of emergency or a public health emergency declared by the Governor. The EDA will also be authorized to grant certain business documentation submission deadline extensions.

CISA RELEASES GUIDANCE ON ESSENTIAL CRITICAL INFRASTRUCTURE WORKERS DURING COVID-19

# IDENTIFYING CRITICAL INFRASTRUCTURE DURING COVID-19

There are 16 critical infrastructure sectors whose assets, systems, and networks, whether physical or virtual, are considered so vital to the United States that their incapacitation or destruction would have a debilitating effect on security, national economic security, national public health or safety, or any combination thereof. Presidential Policy Directive 21 (PPD-21): PPD-21 identifies 16 critical infrastructure sectors.

OSHA Guidance on Preparing Workplaces for COVID-19

To reduce the impact of COVID-19 outbreak conditions on businesses, workers, customers, and the public, it is important for all employers to plan now for COVID-19. Click here for OSHA Guidance

COVID-19: Information for Schools and Businesses

To prepare for possible community transmission of COVID-19, the most important thing for schools to do now is plan and prepare. As the global outbreak evolves, schools should prepare for the possibility of community-level outbreaks. Schools want to be ready if COVID-19 does appear in their communities.

# **Industry and Related Resources**

ACC Coronavirus Resource Center

ACC is working on behalf of the U.S. chemical industry and its more than 500,000 employees to ensure that together we all embrace public health guidance from the Centers for Disease Control and multiple governmental authorities to help minimize the spread of the COVID-19 virus. This guidance for individuals is in the best interest of public health. It remains essential however, that key industries and sectors, including the chemical manufacturing sector, are able to maintain operations throughout this challenging time, continuing to provide the countless products needed for life-saving medical care, disinfectants, pharmaceuticals, biocides, personal protective gear, and the chlorine chemistry to protect our nation's drinking water.
